## Videos

*Adapting homes to successfully age in place.*

Medfield, MA: Aquarius Health Care Videos, 2003.

1 videocassette (25 min.)

“Retirement is no longer a brief interlude between work and death. Older adults often live in older homes in need of significant repair and/or modification. Many homes lack the functional design needed to accommodate for the losses frequently experienced by older adults. Since most older persons wish to remain in their own home it is important to know how to adapt the home environment to successfully age in place.”

Green-Field Library Call No.: WM 27.1 VC no. 865 2003

*The green house project.*

Medfield, MA: Aquarius Productions, 2003.

1 videocassette (25 min.)

“The Green House Project is an attempt to design, build and test a radically new approach to residential long-term care for the elderly. It is founded on the idea that the physical and social environments in which we deliver long-term care can and should be warm, smart, and green.”
